

For nearly two centuries, Houghton Mifflin Harcourt has been—and continues to be—committed to creating quality, pedagogically sound content. HMH Learning Architects in our Math, Science and Humanities studios are passionate about building curriculum that is rooted in the latest research, meets standards, and contains appropriate language, images and instructional strategies. We believe that dynamic, reliable and flexible classroom resources can help create learning environments that empower students, educators and their families.

HMH's *Collections* ©2017 is one of these programs! It has a proven track record, and we remain confident in its ability to deliver the highest-quality literacy tools to middle and high school students. We are proud to report that this beloved program:

- Reflects the rigor and complexity requirements of the standards while being streamlined and easy to use
- Focuses students on the essential protocols of close reading through a compact Student Edition, frequent practice in the Close Reader, and robust instructional supports in the Teacher's Edition
- Includes scaffolding pedagogy and technology to help all learners across the ability spectrum access content and increase competencies
- Offers a seamless, consistent interactive digital learning environment that mirrors the technology that students use outside the classroom
- Provides the perfect solution for districts and teachers wanting the assurance of both solid content for meeting standards and flexibility for tailoring lessons to individual teaching styles and preferences
- Boasts an Essa rating of "Promising"
- Gets results! 7<sup>th</sup> grade students made a 24-point gain and 9<sup>th</sup> grade students a 16-point gain in a yearlong study conducted by the Educational Research Institute of America (ERIA)

HMH is committed to supporting teachers, schools, and districts with Professional Services from the point of initial program implementation and beyond. Our mission is to further the goals of the districts we serve, and we do this through a strong and established cadre of dedicated consultants ready to help districts of every size.

*Collections* ©2017 works, teachers love it, and we are proud of the impact that this program makes in classrooms each and every day.
