

## FISHTANK PLUS MATH 3RD-8TH GRADE

### **PUBLISHER'S RESPONSE**

We at Fishtank Learning are thankful to the EdReports Team for their thorough review of our Fishtank Plus Math Curriculum. We are also excited to have received high ratings of our curriculum as it relates to EdReports' new rubric and review criteria, specifically achieving Meets Expectations in all three Gateways for the grade-levels that encompass the full offering of our program.

At the time of the review, our Unit Launch resource was available for two grade levels: Grade 6 and Grade 7. These Unit Launches are interactive, self-guided learning modules that deeply engage teachers in the content of the unit and help build their content knowledge. Unit Launches for the remaining grades, 3, 4, 5, and 8, are currently in production and will be released on a rolling basis starting in the late summer of 2021. Based on the review of the Unit Launches for Grades 6 and 7, we anticipate that once the remaining Unit Launches are available, we will fully meet the criteria for indicator 3B, and our full 3-8 Fishtank Plus math curriculum will meet expectations for all three gateways.

Our mission is to provide teachers with the curriculum and resources they need to engage, challenge, and inspire their students. We welcome the feedback from this review and will reflect on how we can continuously improve our product in service of our mission.
